Last name: Abbott

Organization:

Title:

Comments: The proposed timber harvest and fires in the area of Mt Chocorua and Sandwich Range pose a great threat to the environment, both air and water, with unforeseen damages to habitat in more ways than are presented in the original outdated plan. We have been made ware in recent years, the balance of nature and well being of all species is now our lifeline to our future!!!

RSA Chapters 125C, 483 A of New Hampshire Environmental Protection account for measures to protect human, plant and animal life. Profit will not be worth the the long term losses.

US Forest Service must reconsider plans made more than 15 years ago. The water in our lakes and quality of air as well as all life forms needs serious consideration.

Respectfully, Candace Abbott CLC
