Title:

Comments: This project would be beneficial to the cities of Big Bear Lake, Big Bear City, and to the economy of the area. The vehicular traffic would be reduced between Snow Summit & Bear Mountain during busy ski days, if skiers have the option to get from one resort to the other using the new lifts/runs. Also, connecting the 2 resorts will elevate Big Bear's status as a top-notch ski destination and will attract more tourists and tourist spending. The businesses in Big Bear will make more revenue, and the cities will bring in more tax dollars. All around this will benefit many people and businesses.
