Title:

Comments: Our family is very concerned about the plan to cut and burn on and around Mt. Chocorua. We have been hiking the Liberty and Brook trails for generations. The cutting and burning would destroy the beauty of this special - even iconic - place, not to mention that it will destroy habitats of animals and plants that are already struggling with the affects of habitat loss and global warming. Please think about the future of our fragile environment and the thousands of people who connect with nature each year on the White Mountain trails. Thank you.
