Comments: The Sandwich Vegetation Management Project #57392 (Project 57392) is based on the White Mountain National Forest Land and Resource Management Plan of September 2005 (Forest Plan). The Forest Plan is now 18 years old. National Forest Land and Resource Management Plans are required, by law, to be updated every 15 years. To comply with the law, the Forest Plan needs to be updated before Project 57392 can be adopted. I do have a many comments I could make about the current draft of Project 57392 but there is no point since it will have to be substantially revised once the new Forest Plan is adopted. I look forward to commenting on the draft of the new Forest Plan when it becomes available.
