Title:

Comments: I am submitting a public comment asking you to please protect the Sandwich Range from logging or other impactful projects. It is a spot near and dear to our family and our recently deceased uncle has just had his ashes spread there for its beauty, peace, and preservation. The natural resources present in this special place are invaluable left undisturbed. Living in a time of environmental devastation and collapse should awaken us to truly preserve these natural places that are vital to our local ecosystems and support our spiritual tethers to the land. Please protect and preserve this place .
