Comments: I saw a patroller posts reference to this project on social media. Upon initial impression as a ski patroller, I wonder how you might evac the interconnect, especially in the summer. I didn't notice anything specific on that but it may require planning and budgeting, especially considering evacuating elderly who attend grandchildren's weddings, those with disabilities, women in high heels, etc. especially at summer events. Many resorts and patrols have planned similarly. I just emphasize it's important to not have budgetary, equipment, staff, and training surprises.
