Comments: I strongly support the expansion of winter and summer activities to help increase capacity across the resort area. Demands on ski lifts have increased dramatically in the LA/OC/SB counties as more people enter the winter and biking activities. As such the USFS should work to improve access in concentrated locations to improve the ability of resorts to provide for more guests. Further the biking trail expansion would be helpful to improve big bear as a summer destination at other resorts further away such as Mammoth and resorts in Utah, NM, and CO are able to provide significantly expanded offerings compared to Socal local resorts.
