Title:

Comments: I think this is a wonderful plan. It will make Big Bear more competitive with larger resorts to draw more people without making daytime traffic worse. It will spread the volume of riders across both mountains so that there is less congestion on a single mountain, which will reduce collisions and injuries on the mountains by providing more usable terrain. It will eliminate shuttle bus traffic on the already congested Moonridge Corridor and Summit Blvd. In general, it will get riders off our roads, once they reach their destination and allow them to enjoy more activities in summer and winter. If Alterra is willing to spend the money on capital improvements and not make the current situation worse, and in fact, make it less congested, I'm all for it.
