Comments: As a cabin owner in the South Fork area by the Trask Ranch, I agree the road and the amount of traffic that is now using this road can be a significant risk to starting fires. Consequently, I endorse the plans to reduce fuels in this area as a fire mitigation measure. This effort will no doubt involve some heavy equipment that could further damage the South Fork road. I would like to see that when the fire project is completed, that the road be graded again to eliminate the pot holes and rough areas that the project will most likely create.
