Title:

Comments: As an avid skier, mountain biker, and hiker within the southern California area, I fully support this project. Connecting these 2 ski resorts has always made a lot of sense to me. First, providing a better and larger ski experience locally here in Southern California will reduce traffic and pollution from having to travel to Mammoth or other northern California ski resorts for similar sized resorts. Second, it will reduce in town traffic from buses that currently connect the 2 resorts. My main concern with the Project is maintaining summer road access on 2N10 throughout construction. I assume the proposed "ski bridge" will span or allow access over 2N10. I hope there will be mitigation included for any pine or other large trees removed for the construction of trails and lifts. Mitigation and planting of new seedlings could take place at the former Snow Forest Ski area or other barren mountain slopes around Big Bear Valley.
