Title:

Comments: The project activities include commercial timber harvest on 4,205 acres, and noncommercial vegetation treatments on 3,696 acres including thinning, burning, and whitebark pine planting.

Please do this. The first suppression, the economic growth, promoting white ark pine and diversity of wildlife habitat... all of it is a good idea. As a local user of Forest Service lands, I would encourage the department to move forward with this project. Thank you!
