Subj: Protect the Wildlife Connectivity Corridor
Clarks Vegetation Management Project

Dear Forest Service Personnel:

Please protect the ODFW Priority Wildlife Connectivity Corridor that crosses the northeast corner of the Project area.

Most importantly, PLEASE DO NOT BUILD ANY MORE ROADS into or across the corridor and protect the Little Fish Creek riparian area.

I have hiked, biked, birded, and scrambled in the region for nearly 40 years. Just last fall a friend and I rented llamas from Wallowa Llamas in Halfway and hiked to Pine Lakes. I've been to the top of Cornucopia Peak and driven much of the 66 road. I subscribe to the Hells Canyon Journal and read the August 16th article about your August 10th open house at the Halfway Lions Hall.

I care deeply about the place and people.

Thank you.
Pete Sandrock
