Title:

Comments: As an avid skier and local of Big Bear, I 100 percent approve of this project. It would help disperse so much traffic on the mountain and help with the crowds during the peak season. In addition, we're way overdue for an upgrade to the resorts and experience on the mountain. To be able to move from Bear Mountain to Snow Summit and vise versa without the need to wait in a shuttle line makes so much sense. Clearly, the terrain is there so why not develop it where a ski resort already exists?

This has been talked about for far too long without it actually going through. Please do not give in to the usual objections or pressures and make this happen!!
