Title:

Comments: I am against this forest management plan .

Our spruce trees greatly add to the beauty and biodiversity of the Black Hills.

Sure, there are areas where spruce outnumber the pines but
that should be encouraged and not dealt with by clear cutting and timber sales.

Thin the dog hair pine that encroach the meadows and crowd the forests.

Save our spruce forest Manage it to keep it healthy. Don't sell it out.

The sawmills do not need our spruce trees.
