Comments: I think expanding into No Name Basin is a GREAT idea. The area is beautiful and currently doesn't seem to be accessible by a trail system in the summer. The area would relieve congestion in other areas of the mountain on busy days and give families a great location to isolate kids to a smaller area...making it easier to monitor them.

The Master Plan that was approved over a decade ago already approved many of these proposed changes and Monarch Mountain has done a great job as stewards of the forest area by paving and expanding the parking lots to control silt/runoff.

Please consider strongly the approval of skiing in the No Name Basin area. (My family has been awaiting this expansion for many years.)
