Title:

Comments: Monarch is a much appreciated smaller ski stop between larger ski areas that we visit (Copper, Taos, etc.). It's accessible, lower cost, and less pretentious than the larger ski areas. My wife is a lower intermediate skier and likes the available terrain, and I like the advanced and expert runs that are available. The proposed expansion will add more terrain and interest to the area. This should support additional improvements to the existing base and lifts, which would make the area more appealing to anyone.
