Comments: I just want to say that I am a big fan of the Monarch Ski Area Expansion. In the past 5+ years I have witnessed the Salida/BV area experience solid growth. I don't anticipate this growth slowing down anytime soon.

More people going to Monarch Mountain is inevitable. Eventually, the thing that makes this mountain unique and great will disappear. So expanding the amount of terrain people will ski will prevent the mountain from being too packed for years and years to come.

This mountain not only provides an amazing activity for locals in the winter, but also generates additional revenue for the local business in an otherwise slow time of year for tourism. Basically, the larger ski terrain will bring in more money for local businesses.

Hopefully this will get passed!
