Comments: I do not agree with closing more roads, my family and i love being outdoors including skiing, snowmobiling, etc. and it gets more difficult to enjoy the forest every year. For some people snowmobiles are their only means "physically" for people to get out and about during the long winter months in Montana. The Grizzly bears should be hibernating during snowmobile season according to the wildlife biologist's. I'm sick and tired of the advertisements to get out and explore the forest and then we have this kind of crap come up every year !!!!
