Comments: Hello,

Thank you in advance for reading my comments.

I completely support the expansion of skiable terrain at Monarch Mountain.

As population increases, people need places to recreate. Skiing should expand along with population. Skiing is a great way for people to enjoy public land and recreation should be encouraged. Skiers should be able to spread out and should not experience congestion like I-25 through Denver. We need more skier terrain.

Thank you for considering my thoughts.

Kindest regards,

Bill Benson
