Comments: I am against you closing these roads to public access, due to protecting the grizzly bears. The grizzly bears you are trying to protect are becoming too populated & our killing "people". There should be a hunting season aimed at grizzlies, to keep this predator controlled. Our public lands are for our use; "not" to protect these animals that are allowed to be out of control. It is a tragedy that those who make these decisions, can not see the harm they are causing. Our tax payer dollars are being wasted, every time a grizzly kills a human or cattle, & has to be put down. Put a hunting season on the grizzly & raise money while keeping this dangerous animal under control.

Thank you for considering my comment.
