Comments: I am against the use of e-bikes on any trails in the US Forest or BLM- paved or not. These "bicycles" are dangerous and can go ridiculously fast. These are not 'recreational vehicles' for use in our natural areas. They are commuter vehicles designed to help you get to work or school faster. I feel these almost need their own lane of travel, similar to big cities that have designated lanes for scooters/e-bikes. I fear for the safety of myself, my family, and young children and pets.
