Comments: E-bikes are here to stay. They enable older riders to enjoy trails that age and physical limitations prevent or hinder them from enjoying. I am one of those riders. I believe that if a trail is open to mountain bikes it should be open to all e-bikes including class 2 and 3 bikes. A class 2 or 3 bike does no more damage to the trails than does todays high performance mountain bike. There is no logical reason to prevent them from using trails that are open to mountain bikes.
