Title:

Comments: close the trails to motorized vehicles. the degradation of the trails and habitat by motorized vehicles is incompatible with wilderness, as stated in the Wilderness Act. when im hiking in the wilderness and hear approaching vehicles I have to get out of the way, just like elk. the atv riders who go into wilderness areas are the rudest individuals imaginable, and i know you haven't been in my situation or you would know this. is it your job to empwer the most offensive people? that's what is happening here.
