Comments: I don't really see why people are against E-mountain bikes. The only issue I see is in congested areas where there is bad line of sight. E- mountain bikes are just bikes that don't wear you out as much and allow for longer rides. Unfortunately around Jackson they are basically limited to dirt bike trails that are not very fun on E- mountain bikes. I think the main goal of our public lands should be getting the public outdoors and not discriminating against a single group of growing riders .
