Comments: I'm concerned about ANY use of e-bikes in the parks & on trails. It's crowded enough with the amount of tourists we now have.. & just 'dodging' regular cyclists is hard enough! Unfortunately Most of our younger tourists don't have the manners or consideration for other people on the trails.. Just a Fact! We've lived in WY over 30 yrs & we take Family & Friends to Jackson parks & Yellowstone every yr & I see the difference!! Not Good! Allowing the e-bikes.. any of them is going to be a problem for other walkers & guest ..and you should add injuries to the list.

I worked as a Nurse in JH for over 15yrs.. several of those yrs were in an Emergency Clinic. Just normal biking injuries were quite serious! WHY would you want to subject your guest to being not only inconvenienced but bodily injury! Just trying to get out of the way could cause serious falls!

I truly hope you don't get pressured into these e-bikes bikes due to trying to be 'politically correct' and appeasing a specific group. SAFETY 1st! And think about your older guest & the ones with Family & Children!!
