First name: Ian

Last name: Webb

Organization:

Title:

Comments: Hello, my name is Ian Webb, I am a student at Gonzaga University and I frequent the Idaho Panhandle and northern Montana to fish and hike. The things that I am most concerned over motorized snow vehicles travel plan in the Kootenai National Forest is the safety of skiers and other people participating in other non motorized recreational activities. I am also concerned about the safety and awareness of the people using motorized vehicles and also the preservation of any wilderness or grizzly bear/other animal habitats in areas adjacent to the zones where motorized snow vehicles are allowed.
