Comments: As an employee of Big Bear Mountain Resorts, I personally think this proposal should not be allowed. Living in Southern California where we experience droughts almost every year, we should not be able to install any more snow guns/take anymore water from the lake. Besides that very important fact, if passed this bill will destroy precious animal habitats. When isn't this forest supposed to be under protection for endangered owls/eagles? On top of that we just do not have the internal resources. We are short snow cats due to them always braking down, so adding more runs to maintain on top of trying to maintain multiple parks just sounds like madness. I'm asking whomever this might concern to please reconsider and think about the numerous negative effects this will have on our home, our forest and land that we should be protecting. I understand it sounds nice to be able to connect resorts to help with traffic control or add to tourism but I'm so worried that our town has been focusing too much on those aspects and not enough on preserving this beautiful land we all love and enjoy.
