Comments: What is the purpose of the Spruce Project?

It looks like it is intended to reduce spruce acres? Spruce are a very limited species on the BHNF. Why mess with it at all especially with all the miles of roads proposed? Why not spend time and money on increasing aspen or willow management ? Have you studied the impact on some bird species that are found mostly around mature spruce like the Ruby-crowned Kinglet and the Gold-crowned Kinglet and the White-winged Crossbill ???

I ask again: What is the purpose? This project should be dropped in the waste can!!!
