Comments: No motorized vehicles! why would you make an exception for ebikes? I would understand and support an exception for people who need an accommodation (who suffer from a cardio limitation for example) but not for a vehicle. Opening the door to this turns back decades of limitations on motorized vehicles which has long kept areas in a more wild state. There are plenty of areas to ride ebikes and they do not need more. Lobby groups should not be allowed to sway opinion away from a clear public benefit of more natural areas.
