Comments: To Whom it May Concern,

As a forest permit holder for sheep grazing, I am in hopes that this project will continue to increase the utilization of the area we lease. Logging the dead trees from our permit has certainly improved the site in many different ways. It looks and is much healthier as the reseeding process has begun and enhanced everything about that mountain. It has been amazing to watch the impact. We appreciate the forest rangers and supervisors for these improvements and feel it is much safer, healthier, more resilient and definitely more beautiful.

Thank you,

Lorraine Bailey
