Title:

Comments: a motor is a motor --tech is always going to be there--what will ebikes be in another 5-10 years keep it simple--either its opened to motorized or closed -- not hard to to understand--many trails-routes are open to ebikes let them stay open and people can ride there--as people become older--they might not be able to climb the same hill - walk the same trail- ski the same mountain-- so we change our paths--trails- to meet our our needs and ability--not the rules rules and regulations--in my on dealing with ebikes i find most users are young well fit and only purpose is to get from point a to b as fast as can-- next we will have ecartes -eats-etricycles etc-- with now forest personal who is going to enforce and manage this so calle class 1 -- class 2 - etc ebike usage -a motor is a motor--as time changes many of the same who indorsed non-motorized trails are now wanting to change the rules for their on little interest.
