Comments: I appreciate all the work that The Inyo NF is doing to help resolve user conflicts around Mammoth Lakes. I only have two suggestions.

We should preserve nonmotorized recreation at the Shady Rest area by creating a separate trailhead. This would preserve the existing groomed Nordic loops and Shady Rest Park itself for human powered users.

Secondly, please do not designate for OSV use the Sherwins area from Mill City and Mammoth Rock to Bardini and the Tele Bowls. There are many human powered users in this area.

While I do ride and enjoy snow machines myself, I recognize that they do have an impact on other users and the environment with noise, smell and especially domination of the precious powder that skiers should also have a right to enjoy.

Thanks,

-Loren Rupp
