Comments: One of the most special things about the Jackson Hole, Range, or district is our quick access to the outdoors with our town and community growing faster than ever or you seriously need to consider over usage of our resources. It's premature in my opinion to allow motorized vehicles on Teton Pass I think in places where motorized recreation is already permitted. Should be the target areas, E bikes are quiet, but new E technology may not be we could be adding noise, higher speeds and less season users to our networks, while inviting those who may find it less pleasant to take a human powered vehicle there and adding that volume of people to a network since this is the first round, I think it's good to play conservative where the comments and see where this technology is going first Look at the beaches of Hawaii and California with the electric hydrofoils. Look at the national parks, battling drone issues and what about the assist winter recreation Israel, big unknowns, and places where the hydrofoils and drug technologies are not bad it's an all out assault on three dimensions, Lancy and hair I don't think we want to here

Thank you Rick
