Comments: I have no problem with the wording of the (OSV) Use Designation #61466 proposal. The problem to enforce it is quite another issue. I would like to see rangers at major access entry points on weekends and major holidays. If illegal entry points are being used, monitor those also.

In my opinion, forest service signage is often ineffective due to wordiness. Be brief! An example of poor signage has been on view at the entry point for the Public Access Path at Tamarack Cross Country Ski Area. The illegal use of snowmobiles in that area increased last year. I am unable to include a photo since it isn't ski season!
