Comments: Thank you for the opportunity to comment on EMTBs on the select areas outlined in your scoping letter. I am in support of allowing EMTBs in these areas. I am an advanced mountain bike rider but I have had increasing physical limitations in the past 10 years due to various injuries. Ebikes have brought me back to riding on the paved pathways, and the idea of mountain biking in these areas you outlined again with the assist of an EMTB is very exciting. I am a responsible, skilled biker, and would absolutely love the opportunity to access areas I have not had the ability to access for many years due to physical limitations.

Thank you!
