Comments: I just wanted voice my opinion to strongly oppose this proposition of the group campsites and film production in Little Duncan Bay in Petersburg, Alaska. I have been born and raised here in Petersburg my whole life and a lot of people including myself utilize this area to harvest wild game, and to put meat in our freezers each year to support our families. I know this will hinder some fellow hunters from being able to do that as they utilize this area each year. Especially since the harvest limit for deer on Mitkof is only 1 deer a person, lots of fellow Petersburg residents hunt the Duncan area since the harvest limit is 2 deer. The fact that this request is being proposed during hunting season and through the rut is alarming. I hope you take time to consider the negative impacts this could have for multiple families in our community.

Thank you for your time,

Blake Buotte
