Comments: Hello,

I am submitting a comment pertaining to the BBC filming Outlast TV production on Kupreanof Island.

I'm an Alaskan resident from Valdez that is employed as a Medic through the Alaskan based company GEMS Safety who is contracted through the BBC to work as safety for the Outlast TV production.

Having worked many of these TV productions in Alaska over the years I have seen the positive economic benefits that this brings to the communities and as an avid outdoors person I would not work these jobs if they had significant and negative impacts on the environment. Just like the other 15 GEMS Safety employees who are also Alaskan residents we all love our natural beauty and resources that this state has and want to keep it that way. The economic benefits are numerous from the hotel rooms we stay in, the restaurants and catered food, boat and air charters, and Main Street store fronts that we and the production companies spend our money at.

Thank you for taking the time and excepting comments for this production on public lands. If you have any questions or concerns feel free to email or call me.

Best Regards,

Taylor Brown
