RE: Comments for E-bike proposal

I previously lived in the Jackson area and still use the Jackson Mountain Bike Trails that would be impacted by the proposed changes allowing e-bikes on them. I also mountain bike in Park City and other areas. Let me say I am completely against e-bikes on mountain bike trails. Trails are already getting a LOT of use. Adding e-bikes is only going to increase the numbers on these trails. Additionally, I strongly feel the point of biking is to be active and to get a work out in . E-bikes do not do this. They are mopeds or small motor cycles that only create more users that are not being active. NOT allowing e-bikes on these trails forces these less active people to get a bike and get active to use these trails. Please stop the use of e-bikes on these trails.
