Comments: Dear Forest Service,

You are custodian of wilderness, something sacred to many Americans. Please stop degrading it in a piecemeal fashion, one nibble at a time, expanding motorized back country access. I oppose allowing motorized transportation devices in the forest.

I am aware that many commercial interests look forward to renting ebikes to tourists and champion this expansion on backcountry access and are well organized through the highly efficient Jackson Hole Chamber of Commerce. Please oppose this latest attempt to monetize wilderness.
