Comments: Please no! There are plenty of moto trails in the area and e bikes can ride those trails.. No offense, but the forest service will not be able to enforce regulations on these trails. E-bikes mean more people on the trail, and the impacts of those increased numbers are not well understood, nor able to be mitigated for. If the FS had a budget like the defense department, I might not be so opposed, but more users, traveling at faster speeds requires oversight. As a frequent rider of these trails, I oppose allowing e-bikes on them.
