Comments: I own the land on the south side of Eagle Creek Road just west of the 4 mile marker. There is a large beaver pond on my property that has been used in the past by multiple wildfire helicopter crews (3 at a time) to fight previous fires. I had the electrical lines moved, at my own expense, to improve access for the helicopter crews. Have you considered getting the permits necessary to enlarge this beaver pond for future wildfire fighting efforts? The pond is entirely on my land and I would give approval for this project if it is permittable.

Secondly, as a landowner, how can I contribute to the fuels reduction effort? As I have about 40 acres of 2nd growth forest that can definitely be harvested for lumber if done in an environmentally friendly manner.
