Title:

Comments: You should absolutely allow class 1 E-bikes!

1. They are an incredible way to enjoy the beautiful mountains with no emissions and no extra noise.
2. Class -1 e-bikes don't have enough power to destroy trails like other motorized bikes do.
3. These bikes are incredible for training because you can stay in zone two much more effectively.
4. They are also amazing because you can explore so much more and spend so much more time in the mountains.
5. Class 1 e-bikes also allow the older population and others with limited physical impairments to continue to enjoy nature.
6. Those who are against class 1 e-bikes should check their privilege at the door and understand that they are not the only people who deserve to have access to the mountains.
7. On a class 1 e-bike there is no difference in speed on the descent and on the ascent there is a limit to how fast you can really go. These bikes are just pedal assist bikes that only can assist you up the mountain, not take you up the mountain.
