Comments: I support the proposal to allow class 1 emtb's on Teton pass area trails and increase the seasonal allowed use on Big Munger and Horsetail trails.

I would also support a sticker to clearly mark Class 1 ebikes but I do not support a fee required for said sticker.

Additionally, in the future, I would support embt use on all trails currently open to mountain bike use.

They are not motor vehicles as defined as being "any vehicle which is self propelled" as they require being pedaled. I also believe any user conflict resulting from increased use could be mitigated with more available trails for embt use. Having only 12% of singletrack trail currently available to conventional mountain bikes open to emtb use seems grossly inadequate.

Thanks,

John Wauters
