Comments: The mountain bike trails on Teton Pass have seen year over year growth since their inception. This trend will no doubt continue as the region experiences continued growth as well as recognition as a world class venue for mountain biking. In view of this and the resulting over crowding and congestion, I am opposed to opening up the identified trails to ebike use EXCEPT for the possibility of an exemption for seniors (over the age of 62?) and disabled.

Thank you for your consideration.
