Comments: The USDA seems to be consistently against common sense, science, and ending climate chaos.

What is your problem???

*An Environmental Impact Statement (EIS) should be prepared and not the currently proposed Environmental Assessment (EA).

*A young growth sale that results in round log export is not in line with goals from the Southeast Alaska Sustainability Strategy (SASS) and isn't in the best interests of Southeast Alaska communities.

*Current plans look short on wildlife and restoration priorities in a large project area.
