Comments: To Whom it May Concern,

I am concerned about the health of our forests and wildlife  in Alaska. The Forest Service is proposing to log and treat more than 25,000 acres of young-growth.  This is what I am asking for your consideration, as a concerned citizen:

1. An Environmental Impact Statement (EIS) should be prepared and not the currently proposed Environmental Assessment (EA).
2. A young growth sale that results in round log export is not in line with goals from the Southeast Alaska Sustainability Strategy (SASS) and isn't in the best interests of Southeast Alaska communities.
3. Current plans look short on wildlife and restoration priorities in a large project area.

Thank you so much for your consideration!
Respectfully, Aimee Creelman
