Comments: Please consider the following:
An Environmental Impact Statement (EIS) should be prepared and not the currently proposed Environmental Assessment (EA). In addition, a young growth sale that results in round log export is not in line with goals from the Southeast Alaska Sustainability Strategy (SASS) and isn't in the best interests of Southeast Alaska communities. It is troubling that current plans look short on wildlife and restoration priorities in a large project area. Effects on wildlife and restoration should be of very high priority.
