Title:

Comments: I strongly object to cutting in this area or any area that boasts multiple long term trails. Recreation in these very popular areas would be heavily impacted if not wiped out and is not an option. I have seen these logging operations first hand and they are ugly and are not acceptable. Recreational use and the pressure of climate change where the forests are needed more than the money the forest service makes should preclude the income you are seeking. Also the original plan was to include a recreational plan and apparently this has not been accomplished. This cut should be scrapped.
