Comments: I'd like to second the Winter Wildlands Alliance comments regarding the INYO National Forest OSV use plan #61466. I am one of the 98% of users who travel under my own power, and don't appreciate the disproportionate noise, air pollution, and snow and soil damage caused by the 2% of users who can't or won't.

I'm also concerned the snowmobile manufacturer's lobbies may wield a disproportionate influence over the forest service.
