First name: EARL

Last name: ROBERTS

Organization:

Title:

Comments: When greedy oil and gas corporations are allowed to enter protected forests they begin the destruction of that forest and the land for miles around it involving areas not covered in the corporation leasing "privileges". Then they are so greedy they refuse to clean up their spills, poisoning of the land, air, and waters. Therefore, they should not be allowed within a thousand miles of any national forest or protected areas.
